# Data Collection

## Integrated Data Acquisition Solutions

## Our team of certified digital forensic experts ensures that your data is acquired quickly, securely and defensibly.

**Legility offers four primary scalable and integrated data acquisition solutions.**

- Traditional On-Site Collection
- Remote Collection
- Web Collection
- Enterprise Integration

Each of our collection methods maintain best in class security through encrypted transfer, and ensure defensibility by way of detailed audit logs and documented chain of custody records. Our team is available 24/7, year-round, to offer personalized customer support and extensive, detailed reporting.

### On-Site Collection

Legility's eDiscovery team has performed data collections and analysis for some of the most complex and high stakes litigation and investigative matters. Our digital forensic specialists work as an extension of your team, acting as the bridge between IT and legal assets.

**Legility Team**

**Legility is the independent, global new law company.**

We're here to do the best legal work of our lives alongside our innovator clients.

We deliver transformative legal solutions that build business value and set our clients apart. Our global network comprises 20+ offices & 1,500 people, and our legal operations work spans every industry and practice area. We have world-class data, strategy, and talent operations. But everyone and everything is driven by our core values:

- Do the Right Thing.
- Fabled Service.
- Diversity is in our DNA.
- Passion for Innovation.

### Enterprise Integration

Legility's Remote Governance and Collection Platform (RGC) allows our certified forensic analysts to remotely identify, collect, verify, filter, and report upon your data.

Once our software is installed behind your firewall, permission can be granted to our digital forensic experts as needed, giving them the ability to perform forensic data collections from servers, computers, smartphones, tablets, and any other accessible device on the network. This allows us to conduct remote collection in a timely, secure and cost-effective manner with minimal demand on your IT resources.

### Web Collection

Web collection capabilities reduce your risk and litigation costs with a click of a mouse.

Our web collection platform allows multiple types of data to be safely and defensibly extracted when custodians are difficult to pin down - right through your Internet browser. Plus, your data is fully encrypted and the chain of custody is preserved.

### Remote Collection Portables

Our remote portable collection toolkits are pre-programmed with multiple best-in-class industry software solutions. When on-site collection or shipping devices to our forensic lab is impractical, these mobile utilities can be an effective option.

### Legility eDiscovery

Make the most of your company's time and resources with Legility eDiscovery. Working from left to right on the Electronic Discovery Reference Model, we support strategic initiatives around information governance as well as tactical requirements for data collection and processing. Our technical offerings can be bundled with our Managed Review services for a comprehensive approach. Or we can partner with the review provider of your choice.

> "Legility's expertise and responsiveness were invaluable to us in being able to meet the government's short deadlines and complex document organization requirements. This was an extremely challenging project under very difficult time constraints, and **Legility enabled us to comply with the government's requirements in a timely and highly professional manner** while dealing with hundreds of thousands of documents.
